

## Anti-Piracy Workshop

Trident deliver bespoke anti-piracy workshops and Incident Management exercises to companies at corporate level.

Our imaginative and challenging scenario-driven exercises help to improve the performance of corporate Incident Management Team decision-makers to respond effectively to an incident. Our testing and training is delivered at a pace that starts slowly and builds up gradually, to ensure that our clients get maximum value from the training experience.

### Legal Basis

Guidance within the ISPS Code Part B 13.7 recommends that companies carry out security exercises every 12 months.

### Benefits

The workshop is designed to allow delegates to gain an awareness of the maritime piracy threat and improve the decision-making process of key members of the Incident Management Team. It also exposes the operational level considerations and proves the lines of communication needed in the event of a maritime piracy incident.

Our workshops also help Incident Management Teams to build team cohesion and resilience and ensure that should the worse happen, they are aware of the action that they should take to reduce the risk and manage the situation effectively.

“ The art of war teaches us to rely not on the likelihood of the enemy’s not coming, but on our own readiness to receive him; not on the chance of his not attacking, but rather on the fact that we have made our position unassailable ”
